

TECHNICAL CHARACTERISTICS

- * Max. Floor Space Dimensions : 75 x 75cm
- * Recommended Machine Pressure : 6-7 Bar
- * Air Driven
- * Ball Joint Blocking / Releasing Function
- * Adjustable Height - Min. 66cm - Max. 78cm
- * 360 Degree Working Access
- * Weight : 95Kg
- * MADE IN ITALY

Product Code:
MTM

The Air-Driven Moveable Work Table has become a classic, irreplaceable piece of equipment for the upholsterer. It is simple, economical and unbreakable.

Integration of our work table into your workplace will substantially increase production (up to 20% reduction in time needed for upholstering and covering living room furniture), improve product quality and safeguard employees' health by providing the opportunity to work standing up and thus, eliminating potential spinal damage.

The frame may be secured using the pneumatic system; the equipment is self-supporting, and no fastening to the floor is necessary. Also available with remote control.

Contact your local Sales Representative for more details...
